1934

1934
G H Lucas & Co. was founded by George Harold Lucas as a manufacturers' agent with an office on King Street in Manchester.

1940-46
The company was run by George's wife Mary while he served as an officer in the RAF.

1952
The company relocated to 7 Albert Place in Manchester.

1970
Donald Lucas entered the business now at Thornfield House in Altrincham. While passing his father on the stairs the only words spoken by his father were "good luck son".

1978
G H Lucas relocated to Stamford Park Road in Altrincham and had additional distribution facilities in Glasgow, Leeds and Birmingham. By this time we were master distributors for the likes of Swifts cable tray, Hawke cable glands, Pirelli Components, B-Line, Gewiss and CTL.

1989
G H Lucas relocated to Century Park in Altrincham to a high tech warehouse and office facility.

2007
GH Lucas becomes UK distributors for Raytech International of Italy inventors of Magic Gel which is launched in the UK revolutionising how electrical connections are waterproofed.

2012
Continued success of the GH Lucas name headed by Nick Lucas, son of Don enables a move to Cheadle.

2015
Julian Duke joins the Company as a sales agent for the Midlands area.

2018
Julian & Rita Duke acquire shares in the Company and GH Lucas relocates to Telford.

2023
GH Lucas starts to increase brands, becoming UK distributors for Link2Home & QBrick products.

2024

2024
Additional brand of Tolsen Tools added & Lucas products start to be developed.

ABOUT G H LUCAS

Established in 1934, G H Lucas & Co Ltd has built a reputation as one of the leading suppliers of cable glands and electrical installation equipment to the UK wholesale trade, both as a re-seller of its own range of quality products and also as a distributor for many major manufacturers.

With extensive stock holdings and distribution at our new depot in Telford the company is ideally placed to meet all requirements for electrical installation equipment.

Thanks to a new generation of management, over the past decade, GH Lucas & Co Ltd has evolved to become a leading organisation for manufacturers of innovative electrical products to enter the UK market.

When combining our expertise in branding, marketing, sales and distribution with the latest technology and over 80 years of industry knowledge, G.H. Lucas has quickly become one of the most creative, adaptable, forward thinking and innovative companies within the electrical industry.

ABOUT RAYTECH

Raytech, located near Milan, is the company with the widest range of accessories and components for electrical cables in the world in terms of production.

Passion for design and innovation has allowed Raytech to evolve and adapt to the needs of constantly expanding national and international market standards, without ever skimping on the same scrupulous quality which has always distinguished them in the production field.

The performance specifications of Raytech products have been tested and certified inside their laboratories to ensure maximum reliability.

Raytech's focus on sustainability has been awarded the 2023 Silver Medal by EcoVadis, a leading provider of corporate social responsibility assessments. This recogntion validates their efforts to reduce environmental impact, improve working conditions, and promote ethical practices throughout their supply chain.

Raytech®

MAGIC GEL

Two-component gel with very high dielectric and thermal characteristics, ideal for connection systems (joint shells or enclosures) for power cables.

The insulating and sealing gel, when cast in suitable casings, ensures an IP68 degree of protection and it is able to replace all types of resins. This is a self-sealing insulation polymeric type in two practical bottles or in a single use bag, with cold cross linking. Once poured, the insulation, characterized by very low viscosity, surrounds and envelopes any type of material, cross linking in less than 10 minutes. Completely non-toxic, cross linking with a very low isothermal peak that does not thermally stress the materials it comes into contact with.

ENERGY

WHAT DOES A GEL FOR THIS TYPE OF SYSTEM HAVE TO GIVE?

INSULATION: Elevated voltages (1 kV operating, 4 kV testing)

THERMAL PERFORMANCE: Operating temperature 90°C, overload temperature 130°C, short circuit temperature 250°C

SEALING: Installations also possible in humid environments, flooded wells

DEGREE OF PROTECTION: Must also work with water between the cores of the cable

CERTIFIED SYSTEMS: The combination of insulation gel + casing must comply with current standards CEI 20-33 and EN 50393

SOLUTION

MAGIC GEL meets all your Energy System requirements!

ADVANTAGES

For high temperature applications
Quick cross linking (only 10 minutes)
Re-enterable also after long working periods
Low viscosity
No limited shelf life

MAGIC GEL

SPECIFICATION

Gel: UL 94-HB
Dielectric strength: >20 kV/mm
Cross linking time: Fast (about 10 min. at 23°C)
Volume resistivity: >2 . 10^{15} Ω cm
Working temperature: -60°C / +200°C
Overload temperature for short periods: Up to 250°C
Stabilised for: Mould - UV
Degree of protection: IP68 (in proper casings)

IP68 OFFICIALLY TESTED

Magic Gel protects against dust and seals the connections from the effects of continuous immersion in water when it is poured into casings protected from the ingress of solid bodies, thus helping to create a **IP68** system.

MAGIC GEL

Colour: Blue
Includes one jug and wooden spatula (Magic Gel 300 excluded)

ITEM / PART NO	PACK OF	TOTAL SIZE	TRADE
MAGIC GEL 300	2 bottles	300ml	£17.36
MAGIC GEL 420	1 single, 2-component bottle	420ml	£22.28
MAGIC GEL 1000	2 bottles	1000ml	£40.50
MAGIC GEL 2000	2 single, 2-component bottles	2 x 1000ml	£80.21
MAGIC GEL 10000	2 tanks	10 litres	£374.55
MAGIC GEL COMBI PACK 1	Variety of bottles	6.06 litres	£292.50

MAGIC GEL COMBI-PACK

Perfect for trade counter display
Includes a range of different sizes, suitable for display
Designed with electrical wholesalers in mind
Offers more consumer options, increasing sales

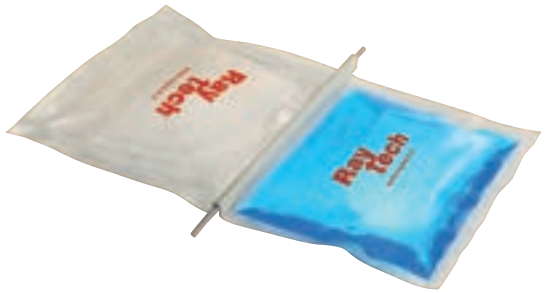

Includes:
3 x MAGIC GEL 1000
3 x MAGIC GEL 420
6 x MAGIC GEL 300

TRADE
£292.50

MAGIC FLUID

Magic Gel is also available in a 2-component single dose bag, introducing *Magic Fluid*.

MAGIC FLUID 550	2-component single dose bag	550g	£25.78

MAGIC GEL SPRINT

Insulating and sealing gel with very high dielectric and thermal characteristics, ideal for POWER cables, TELECOM cables and ELECTRONICS CIRCUITS.

Magic Gel Sprint is formulated for an extra fast curing directly inside the bottle. Practical, performing, eco-sustainable, it is the ideal GEL for insulating and sealing boxes of the most commonly used dimensions.

QUICK SETTING & TIME SAVING

SPECIFICATION

Gel: UL 94-HB
Dielectric strength: >20 kV/mm
Cross linking time: Fast (about 7 min. at 23°C)
Volume resistivity: >2 . 10^{15} Ω cm
Working temperature: -60°C / +200°C
Overload temperature for short periods: Up to 250°C
Stabilised for: Mould - UV
Degree of protection: IP68 (in proper casings)

ADVANTAGES

Suitable for installation in chlorinated and salt water
For any type of indoor / outdoor and even submerged installation
Re-enterable
No limited shelf life

TESTED

RAY GEL

Insulating, sealing, re-enterable fast cross linking two-component silicone gel for telephone and intercom systems and for LED and display protection.

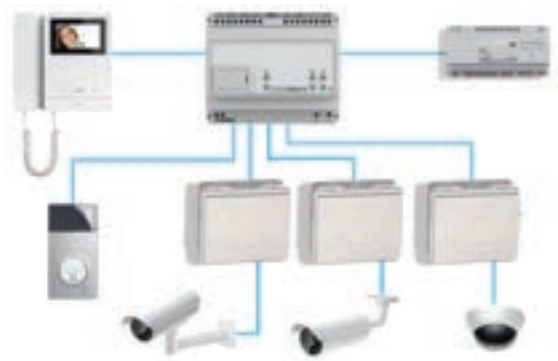

SPECIFICATION

Gel: UL 94-HB
Dielectric strength: >20 kV/mm
Cross linking time: About 15 min. at 23°C
Volume resistivity: >1.5 x 10^{15} Ω cm
Operating temperature: -60°C / +180°C
Thermal conductivity: < 0.2 W/m°K
Dielectric constant: < 7
Degree of protection: IP68 (in proper casings)

ADVANTAGES

Quick cross linking
No limited shelf life
Re-enterable

MAGIC POWER GEL

The unique two component gel in a single bottle, with superior dielectric, sealing and thermal characteristics, re-enterable and re-usable!

SPECIFICATION

Gel: UL 94-HB
Dielectric strength: >20 kV/mm
Cross linking time: Fast (about 15 min. at 23°C)
Volume resistivity: >2 . 10^{15} Ω cm
Operating temperature: -60°C / +200°C
Overload temperature for short periods: Up to 250°C
Stabilised for: Mould - UV
Degree of protection: IP68 (in proper casings)

ADVANTAGES

Re-usable as well as re-enterable, even after long working periods
Suitable for installation in chlorinated and salt water
No limited shelf life

ITEM / PART NO	COLOUR	SIZE	TRADE
WONDER GEL	●	280ml	£17.50
WONDER GEL INVISIBLE	○	280ml	£17.50

IP68 OFFICIALLY TESTED

Single component insulating gels in cartridge to instantly protect new installations and oversee maintenance of all types of electrical connections.

SPECIFICATION

Gel: UL 94-HB
Dielectric strength: >20 kV/mm
Volume resistivity: >2 . 10^{15} Ω cm
Operating temperature: -60°C / +200°C
Overload temperature for short periods: Up to 250°C
Stabilised for: Mould - UV
Degree of protection: IP68 (in proper casings)

ADVANTAGES

Ready to use! No mixing required! Already cross-linked! No need to wait!
Non-setting

WHAT DOES IT GUARANTEE?

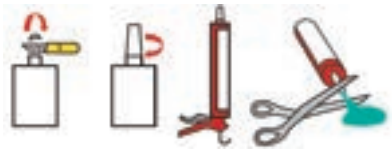

Maximum insulation and sealing
Effective and stable adhesion with the passing of time
High resistance to water pressure
Degree of protection IP68 when dispensed in suitable casings

WHY IS IT IN A CARTRIDGE?

Always ready to use and at your fingertips
Can be used with standard guns
It is measurable
No waste
Complete with nozzle
Extremely rapid to use even in difficult positions
Compact

Includes one jug and wooden spatula (excludes Rubber Fluid)

ITEM / PART NO	PACK OF	TOTAL SIZE	TRADE
MAGIC RUBBER 500	1 single, 2-component bottle	500g	£47.41
MAGIC RUBBER 10 000	2-component tanks	100kg	£833.52
RUBBER FLUID 200	2-component single dose bags	200g	£19.99
RUBBER FLUID 350	2-component single dose bags	350g	£32.77

Fast cross linking two-component rubber, fluid, flexible, elastic and re-enterable with unlimited shelf life.

SPECIFICATION

Cross linking time: 15 min. at 23°C
Volume resistivity: >2 . 10^{15} Ω cm
Dielectric strength: >20 kV/mm
Specific weight: 1.22 aprox
Degree of protection: IP68 (in proper casings)

SKY PLAST

Two-component insulating rubber, mouldable, self-extinguishing paste with high dielectric characteristics.

ADVANTAGES

Low smoke and toxic and corrosive gases emission
Able to replace taping, heat-shrinking, resin finishes
Flexible and elastic
Quickly ready for use

Colour: Grey

ITEM / PART NO	PACK OF	TOTAL SIZE	TRADE
SKY PLAST 250	2 cans	250g	£29.93

GALACTIC ANIMAL BARRIER

Mouldable two-component rubber paste to prevent animal intrusion.

Galactic Animal Barrier is a two-component paste with no shelf life that can be easily moulded before cross linking is complete. It can be applied to entries to protect against intrusion (conduits, cable ducts and pipes etc). It cross links quickly to form an effective barrier against small insects however it is easily removable. Ideal for electric gate type installations.

Total size: 250g | Colour: Grey
2-component rubber; 1 can for component (A+B)

SUPER BLOCK

CONNECTORS INCLUDED

The new Gel Box with integrated lever connectors: ready, complete, submersible and compact.

The GEL BOX range, designed in 2015, is enriched with a new range of compact and waterproof connecting devices. For increasingly secure and high-performance connections over time.

ADVANTAGES

- For straight or branch connections of 3 or 5 rigid or flexible wires up to 4 mm²
- Tool-less
- Can be powered immediately - Always re-enterable
- Pre-filled with conforming viscoelastic gel, not classified as hazardous
- Re-usable
- Without shelf life

Straight joint pre-filled with gel.

Galactic Mammut Security is an extremely compact accessory that is suitable for resolving insulation and sealing problems. Make reliable strip connector connections using the components found within the kit. Supplied with connectors for up to 3 core 4mm cables.

ADVANTAGES

No more tangled wires or uncovered connectors
A safe, reliable and quick solution
Suitable for all types of domestic and industrial uses

HAPPY LINE

CONNECTORS NOT INCLUDED

The revolutionary re-enterable mini accessories with 3 entrances, pre-filled with gel and suitable for submersible installations (IPX8).

Designed in 3 dimensions to rapidly insulate and seal the most commonly used connectors. The 3 entrances not only guarantee the extreme flexibility in the range of these products by making possible triple configurations but also by the housing accepting a wide variety of connectors.

JOINT 6

GEL BOX LINE

CONNECTORS NOT INCLUDED

Gel pre-filled accessories for sealing, protecting and making safe electrical connections.

ADVANTAGES

No limited shelf life
Ready to use

SPECIFICATION

Gel: UL 94-HB
Working temperature: 90°
Installation temperature: -40°C / +50°C
Fully submersible
Can be used underground
Halogen-free Gel
UV resistant

Electrical performance:
CEI EN 50393
Class 2 with CEI 64-8

IPX8

SUPER CLIK

CONNECTORS INCLUDED

Range of fast gel pre-filled straight or branch type joints for 0.6/1 kV multi core cables of up to 5 conductors.

The combination of the primary insulation in a cross-linked polymer gel and the highly robust insulating plastic case makes this a Class 2 joint defined by CEI 64-8. The joint has been tested in accordance with the main international specifications, with repeated flexing and torsion tests and immersion in water, it has been declared as conforming to the mechanical, electrical and sealing specifications required for plastic cable accessories. The joint and its components have an unlimited shelf life, they are chemically inert and therefore completely safe; the connections are re-enterable even after long working periods. Made of self-extinguishing components, the joint is flame retardant. For cables at 90°C working temperature.

ADVANTAGES

Complete with insulated terminal blocks
Re-accessible
Flame retardant
No limited shelf life

SPECIFICATION

Gel: UL 94-HB
Casing mix: UL 94-V2
Working temperature: 90°
Installation temperature: -40°C / +50°C
Fully submersible
Can be used underground
Halogen-free Gel
UV resistant
No flame propagation: CEI 20-35 | IEC 60332-1 | HD405-1

Electrical performance:

SOLAR COVER

The extra dark cover with gel filler, for sealing connectors from 4 to 10 mm² for solar.

It prevents the deterioration of connectors, preserving their performance over time, thus avoiding malfunctions and difficult and expensive maintenance. Resistant to UV rays, corrosion and immersion in water, even if salty or chlorinated. Ready, fast and always inspectable.

SPECIFICATION

Gel: UL 94-HB
Casing mix: UL 94-V2
Working temperature: 125°C
Installation temperature: -40°C / +50°C
Halogen-free Gel
Loaded with CARBON BLACK UV resistant
No flame propagation: CEI 20-35 | IEC 60332-1 | HD405-1
Self-ignition temperature: > 400°C
Operating voltage: 1500V DC

Electrical performance:
CEI EN 50393
Class 2 with CEI 64-8

IP68
OFFICIALLY
TESTED

ADVANTAGES

Made of UL 94-V2 polypropylene
Highly resistant to water, corrosion and frost
Complete with sealing silicone gel filler, non-toxic and safe
It is the ideal accessory to protect cable connections for solar and photovoltaic systems over the seasons and consequently affected by variations in temperature and weather conditions
It allows the reduction of risks from electric arcs and the resulting overheating

SOLAR COVER

For connectors from 4 to 10 mm²

ITEM / PART NO	PACK OF	DIMENSIONS	PRICE

KING JOINT

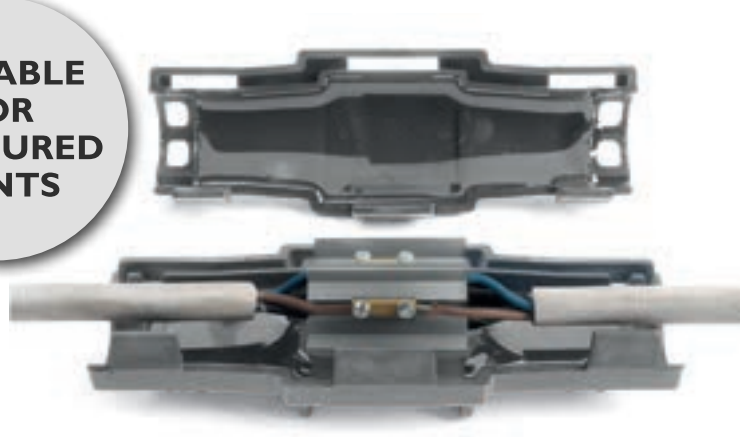

EARTH WIRE INCLUDED

CONNECTORS INCLUDED

Range of fast gel pre-filled straight or branch type joints for 0.6/1 kV multi core cables of up to 5 conductors.

The primary insulation, consisting of a cross-linked polymer gel and extremely strong plastic insulating housing, make the Class 2, in accordance with the definitions contained in CEI Regulation 64-8. The joint, tested in accordance with the most important international specifications with repeated bending and twisting cycles and immersion in water, was found to comply with the mechanical, electrical and sealing requirements necessary for accessories for plastic cables. The joint and its components have no shelf life, are chemically inert and therefore completely safe; the conductor connections are re-accessible even after long operating periods. Packaged with self-extinguishing material, it is flame retardant. Suitable for cables with a temperature of +90°C.

SUITABLE FOR ARMOURED JOINTS

SPECIFICATION

Gel: UL 94-HB
Casing mix: UL 94-V2
Working temperature: 90°
Installation temperature: -40°C / +50°C
Fully submersible
Can be used underground
Halogen-free Gel
No flame propagation: CEI 20-35 | IEC 60332-1 | HD405-1 (low smoke + toxic + corrosive gas emissions)
Degree of protection: IPX8

ADVANTAGES

Complete with screw connectors, spring clips + earth wire
Re-accessible
Flame retardant

Electrical performance:

READY CAST

CONNECTION BLOCK INCLUDED

The new pre-filled resin joint for extruded insulation cables up to 1 kV.

Thanks to its innovative pre-engraved and fracture-facilitated cable entry system, Ready Cast adapts itself quickly and extremely easily to any cable diameter, while respecting the minimum and maximum diameters that can be housed in the range. With the quick and safe connection block included in the pack or with commonly used connectors that can always be housed in the practical 4x separator, included in the kit.

SPECIFICATION

Resin: UL 94-HB
Working temperature: 90°
Installation temperature: -40°C / +50°C
Fully submersible
Can be used underground
Halogen-free Resin
UV resistant

Electrical performance:
CEI EN 50393
Class 2 with CEI 64-8

IP68
OFFICIALLY TESTED

ABOUT QBRICK

The QBrick System brand is the modular and mobile tool's workshop, dedicated to both DIY enthusiasts and trade professionals.

Durable, spacious and functional QBrick System's toolboxes can be combined with each other in different ways dependng on individual requirements.

QBrick System latches and connectors have a great impact resistance. Made of technical polyamide which provides a high durability without risk of corrosion.

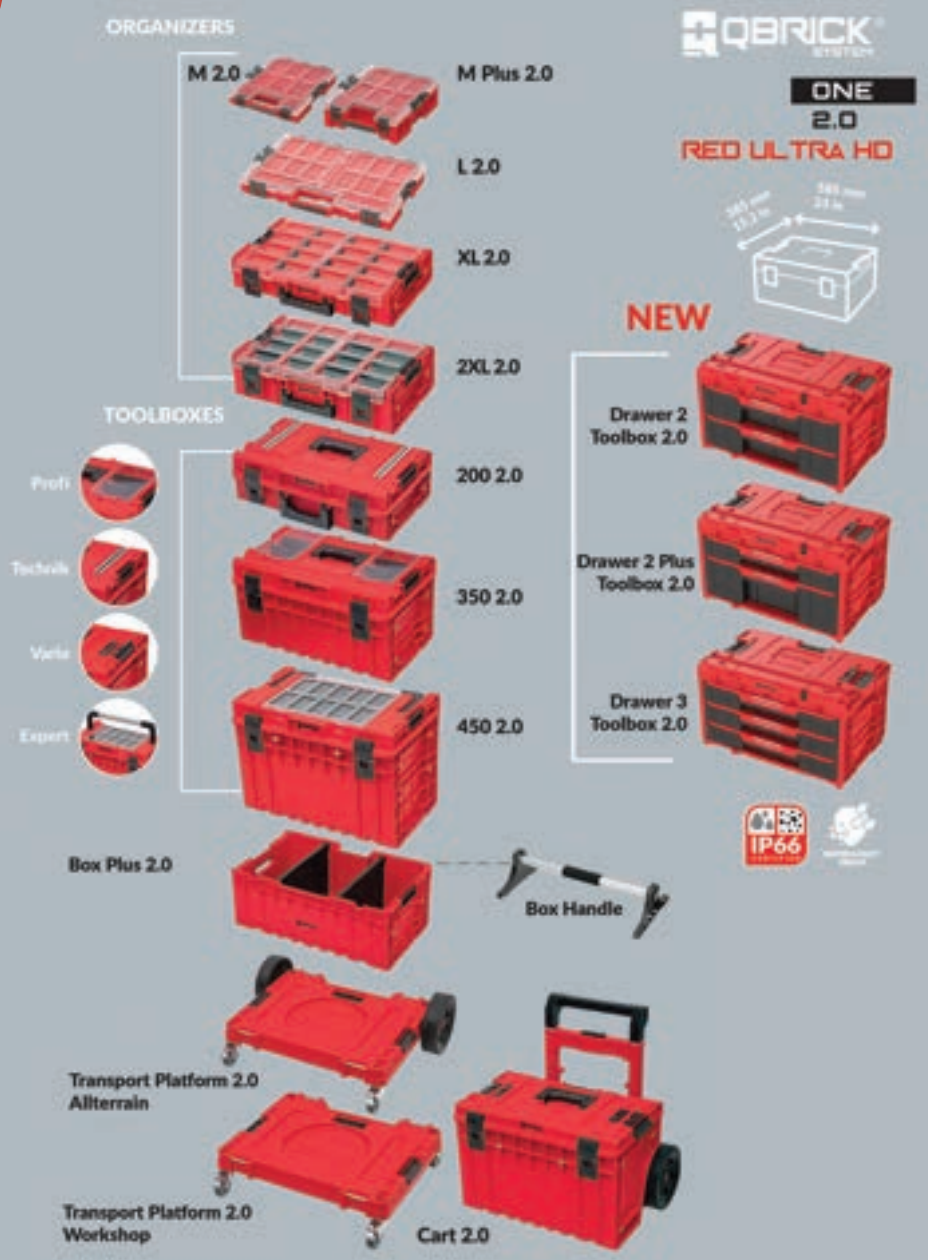

QBrick System ONE and PRO toolboxes are water & dust proof. Thanks to the seal and hermetic construction, the products provide high protection for valuable tools.

Version 2.0 of the QBrick System ONE range is a new generation of toolboxes and organizers with a reinforced construction. The additional adaptation of the boxes to accommodate M8 threaded inserts makes it possible to personalise the system to suit the user's needs.

QBRICK® SYSTEM

SYSTEM ONE RED 59cm IP66

RED ULTRA HD is a special edition of Qbrick System ONE products made of ultra-durable plastic that is characterized by extraordinary resistance to mechanical damage. Conducted impact tests confirm its extraordinary durability, also in conditions below 0°C.

Version 2.0 of the ONE line of products is a new generation of toolboxes and organizers with a reinforced design. Additional adaptation of the bodies for the installation of threaded inserts in the size of M8 gives the possibility of any personalization of the system for the needs of the user. The Custom version of this case model is equipped with ten threaded inserts in M8 size allowing for individual adaptation by the user.

ONE CART 2.0 RED

QS ONE Cart RED Ultra HD is a large capacity mobile toolbox equipped with large wheels mounted on a metal axle. It is equipped with a telescopic handle made of anodized aluminum. For better organization of the interior, the box is equipped with two trays and two compartments.

TOOLBOXES

Choose a style to suit your needs.

VARIO

The standard version of the VARIO cover is equipped with additional connectors that allow this version of the cover to be connected with the toolbox models from the Qbrick System PRO – 500, Toolcase, Toolbox, Organizer 100, 200 and 300 lines, and alternatively with PRO 600 boxes. This is a unique version of the box, thanks to which the user can combine elements from two product lines. The reinforced structure of the cover and the body guarantees high load capacity (50 kg) and withstands pressure of up to 120 kg, making it possible to create comfortable working platforms.

TECHNIK

Technik is the most professional version of Qbrick, equipped with innovative aluminum mounting rails that allow the use of classic carpentry clamps. Thanks to them, Qbrick System Technik boxes can be used as work tables, necessary for precise cutting, gluing or holding. The reinforced structure of the cover and the body guarantees high load capacity (50 kg) and withstands pressure of up to 120 kg, making it possible to create comfortable working platforms.

PROFI

The Profi lid in its standard features two capacious organizers with movable dividers and polycarbonate impact slides. The reinforced structure of the cover and the body guarantees high load capacity (50 kg) and withstands pressure of up to 120 kg, making it possible to create comfortable working platforms.

EXPERT

The new EXPERT lid provides new storage options. Equipped with 8 buckets in different sizes, it allows you to store both small and elongated workshop accessories. The long aluminum handle provides high ergonomics for transportation. Version 2.0 of the ONE line of products is a new generation of toolboxes and organizers with a reinforced design. Additional adaptation of the bodies for the installation of threaded inserts in the size of M8 gives the possibility of any personalization of the system for the needs of the user. The Custom version of this crate model has been equipped with four threaded inserts in M8 size allowing individual adaptation by the user.

ONE TOOLBOX 200 2.0 RED

ONE 200 is a universal, modular toolbox that combines the features of a container for medium-sized tools with the function of an organizer. With adjustable dividers and 6 removable buckets, users can create the optimal combination for their needs. Each box is equipped with a flexible seal that provides full protection against the ingress of dust and water (IP66).

TOOLBOXES

Choose a style to suit your needs.

BASIC

The Basic lid in its standard features a functional trim slot along with a measuring tape. The reinforced structure of the cover and the body guarantees high load capacity (50 kg) and withstands pressure of up to 120 kg, making it possible to create comfortable working platforms.

VARIO

The standard version of the VARIO cover is equipped with additional connectors that allow this version of the cover to be connected with the toolbox models from the Qbrick System PRO – 500, Toolcase, Toolbox, Organizer 100, 200 and 300 lines, and alternatively with PRO 600 boxes. This is a unique version of the box, thanks to which the user can combine elements from two product lines. The reinforced structure of the cover and the body guarantees high load capacity (50 kg) and withstands pressure of up to 120 kg, making it possible to create comfortable working platforms.

TECHNIK

Technik is the most professional version of Qbrick, equipped with innovative aluminum mounting rails that allow the use of classic carpentry clamps. Thanks to them, Qbrick System Technik boxes can be used as work tables, necessary for precise cutting, gluing or holding. The reinforced structure of the cover and the body guarantees high load capacity (50 kg) and withstands pressure of up to 120 kg, making it possible to create comfortable working platforms.

PROFI

The Profi lid in its standard features two capacious organizers with movable dividers and polycarbonate impact slides. The reinforced structure of the cover and the body guarantees high load capacity (50 kg) and withstands pressure of up to 120 kg, making it possible to create comfortable working platforms.

EXPERT

The new EXPERT lid provides new storage options. Equipped with 8 buckets in different sizes, it allows you to store both small and elongated workshop accessories. The long aluminum handle provides high ergonomics for transportation. Version 2.0 of the ONE line of products is a new generation of toolboxes and organizers with a reinforced design. Additional adaptation of the bodies for the installation of threaded inserts in the size of M8 gives the possibility of any personalization of the system for the needs of the user. The Custom version of this crate model has been equipped with four threaded inserts in M8 size allowing individual adaptation by the user.

ONE TOOLBOX 200 2.0

ONE 200 is a universal, modular toolbox that combines the features of a container for medium-sized tools with the function of an organizer. Each box is equipped with a flexible seal that provides full protection against the ingress of dust and water (IP66).

ITEM / PART NO	DIMS (HxWxD)	CAPACITY	TRADE

ABOUT LINK2HOME

More and more of us are looking to make our homes and offices that bit smarter. But that doesn't have to mean complicated costly technology. For us it means taking the electrical products we use every day and improving them to make your home or office more comfortable, convenient, and secure.

Our products are designed to help you better manage day to day tasks in your home, office and garden with the minimum of fuss – just plug and play.

Whether its app-controlled Sockets that let you manage your household from afar, or Wi-Fi enabled LED lights for smarter illumination, Link2Home provides the simple and flexible solution you need.

Link2Home

Easy Set Up

Set up is easy and possible in as little as 10 seconds using the below set up methods:

Our plugs and lamps incorporate both Wireless and BLE connectivity which means when you open the app the device will pop up without any button press needed. All you need to do is add and confirm your wireless password and the device is added.

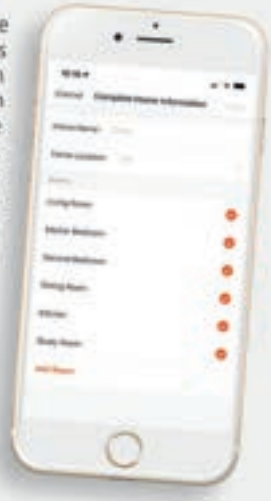

Using the manual mode (recommended) for video devices set up takes around 30 seconds with easy to follow on screen instructions.

You can use the Auto Scan feature to scan your network for new devices without manual intervention but note this set up mode can take up to 2 minutes.

Home and member management

You can add multiple homes or locations under one user log in and switch between them easily on the app home screen. You can also share devices and whole homes with other users and control what devices and features they have access to.

Note: All users will require a Free Link2Home Pro app account.

Smart Control – "Tap to Run"

Using the "Tap-to-Run" settings from the "Smart" menu you can create quick one touch shortcuts to a series of events. These "Tap-to-Run" events are then added as a shortcut in your "Home" screen.

For Example:
You could create an event called "Good morning" in this event you can turn on your lights, boil your kettle and turn up your thermostat.

Smart Control – "Automation"

Set up "Automation" tasks for individual devices or a group of devices are triggered external events. These events require no manual trigger and are triggered by external factors including:

Inter-device synchronisation: Activating one product feature when another product feature is activated. Such as turning on a light if camera motion is detected.

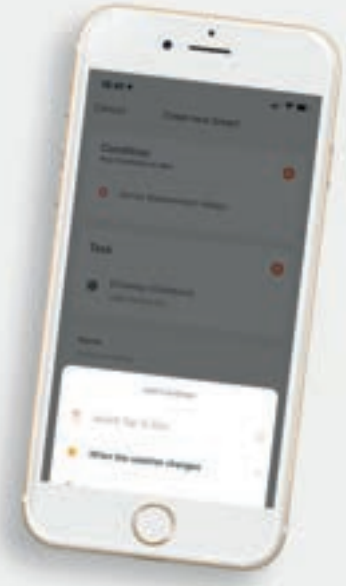

External environment: Split into two categories in weather and location.

Under weather changes you can link changes to temperature, humidity, weather, sunrise/sunset and windspeed.

Under location you can link changes to arriving or leaving a specific location.

Schedule: Set events to specific times on specific days.

For example: Set you outdoor lights to come on when you arrive within 500m of your home location and the sun has set.

Alarm settings and event recording

All camera devices feature sound and motion detectors and when triggered the app will take a snapshot of the event which is then saved in the apps "Message Center". You can also manually take snapshots and record video to your local device.

With all camera devices you can add a Micro SD card which will then record a 30 second video direct to the memory card when an alert is detected. These events can then be reviewed in the app's "Message Center".

Additionally, through the app you can subscribe to our cloud service* to record events to the cloud which can then be reviewed in the app.

*requires additional purchase.

CONTROL AT YOUR FINGERTIPS

Tap-to-Run

Using the "Tap-to-Run" settings from the "Smart" menu you can create quick one touch shortcuts to a series of events.

Alarm & Recording

All camera devices capture a snapshot of key events and will also record video based on events or 24/7 monitoring with no subscription charge!

Home Management

You can add multiple homes or locations under one user log in and switch between them easily on the app home screen.

Automation

Set up "Automation" tasks for individual devices or a group of devices are triggered by external events.

Link2Home Pro Security

The security of your devices and data is extremely important which is why we take various steps to ensure all your devices and data are secure.

- AES, HTTPS Encryption to ensure safety of data transmissions
- WAN Encryption and LAN Encryption
- Virtual device. Instantly recoverable even after hacker attack

Network Wide Safety

- Encryption - We use financial security grade AES data encryption. It can't be decrypted even if a device is lost
- Authentication - Link2Home's self algorithm ensures data isolation and triple level checks of authentication
- Dynamic Key - Dynamic key allocation means safety is also ensured even if the algorithm is exposed
- HTTPs encrypted channel - ensures safe Network transmission

Local Network Safety

- Device Isolation - This isolates devices when not communicating with each other for better security
- AES Encryption - Encrypted transmission in your local area network
- Dynamic Key - Algorithm dynamic allocation when connecting to a network

Link2Home Pro Technology

ZigBee Alliance

Bluetooth | Wifi | Zigbee

Different technology for different applications.

What are your particular IoT needs? How big is your house? How far away are your devices? What kind of speed and reliability do you require? What is your budget?

For the home, what Wi-Fi gives you in bandwidth you lose in battery power and range, and what you gain in range and battery life with Zibgee you lose in bandwidth. So, if your devices and endpoints are running on batteries, Zigbee is probably the better choice.

Zigbee is also a better choice when you want a better range from your product without interference. Zigbee products can send data up to 100m in an open space vs 20-30 using WiFi.

Bluetooth enabled products allow you to set up products quickly and easily without needing to search for product. Our lamp range and Smart-plug both feature Bluetooth technology. This means when setting up new products as long as you have Bluetooth enabled on your device , then the app will find the product automatically. You can then also use our remote control product RMT01 to control your lights and sockets locally.

The goods news is our app and products use a combination of all 3 technologies where appropriate

Note with Zigbee products you will require a Zigbee gateway to connect your products but once installed you can add multiple devices to one gateway.

OUTDOOR BATTERY DOORBELL

ABOUT LUCAS

Established in 1934, G H Lucas & Co Ltd has built a reputation as one of the leading suppliers of cable glands and electrical installation equipment to the UK wholesale trade, both as a re-seller of its own range of quality products and also as a distributor for many major manufacturers.

With extensive stock holdings and distribution at our new depot in Telford the company is ideally placed to meet all requirements for electrical installation equipment. Thanks to a new generation of management, over the past decade, GH Lucas & Co Ltd has evolved to become a leading organisation for manufacturers of innovative electrical products to enter the UK market.

When combining our expertise in branding, marketing, sales and distribution with the latest technology and over 80 years of industry knowledge, G.H. Lucas has quickly become one of the most creative, adaptable, forward thinking and innovative companies within the electrical industry.

LUCAS

FLUSH OCCUPANCY SENSOR

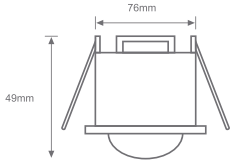

PART NO	TRADE
LS-FLUSH8	£12.90

SPECIFICATION

Infrared motion sensor
For indoor use
360° detection range

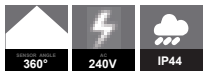

Power Source: 220-240V/AC 50/60Hz
Rated Load Max: 1200W (220-240V/AC)
600W (Energy Saving or LED)
Detection Distance: Max 8m (<24°C)
Time Delay: 10 sec ± 3 sec to 30 min ± 2 min (adjustable)
Ambient Light: <3 - 2000 LUX (adjustable)
Installing Height: 2.2 - 4m

SURFACE OCCUPANCY SENSOR

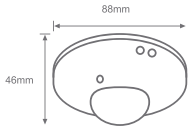

PART NO	TRADE
LS-SURF6	£12.90

SPECIFICATION

Infrared motion sensor
For indoor use
360° detection range

Power Source: 220-240V/AC 50/60Hz
Rated Load Max: 1200W (220-240V/AC)
600W (Energy Saving or LED)
Detection Distance: Max 6m (<24°C)
Time Delay: 10 sec ± 3 sec to 15 min ± 2 min (adjustable)
Ambient Light: <3 - 2000 LUX (adjustable)
Installing Height: 2.2 - 4m

MINI PIR

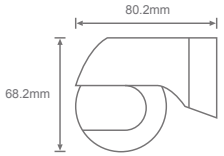

PART NO	TRADE
LS-MINI12B	£12.90
LS-MINI12W	£12.90

SPECIFICATION

Infrared motion sensor
For outdoor use
180° detection range

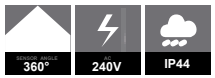

Power Source: 220-240V/AC 50/60Hz
Rated Load Max: 800W (220-240V/AC)
400W (220-240V/AC)
400W LED
Detection Distance: Max 12m (<24°C)
Time Delay: 10 sec ± 3 sec to 15 min ± 2 min
Ambient Light: <3 - 2000 LUX (adjustable)
Installing Height: 1.8 - 2.5m
Detection Motion Speed: 0.6 - 1.5m/s

PHOTO CELL KIT

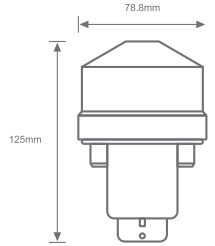

PART NO	TRADE
LS-PCK1	£10.90

SPECIFICATION

Light control sensor
360° detection range
Dusk to dawn photocell kit

Power Voltage: 220-240V/AC
Power Frequency: 50/60Hz
Ambient Light: 5 - 15 LUX
Rated Current: 10A
Time Delay: 10 sec ± 3 sec to 15 min ± 2 min (adjustable)
Ambient Light: <3 - 2000 LUX (adjustable)
Installing Height: 2.2 - 4m

BRASS NICKEL PLATED GLAND

Includes Locknut | IP68

PART NO	CABLE RANGE	TRADE
NP-GM12	3 - 6.5 mm	£1.94
